Why Choose Electric?

The Aurora Series combines traditional sauna bathing with modern convenience.

- Simple, push-button operation
- Consistent and predictable heating performance
- No firewood storage, ash cleanup, or chimney maintenance
- Ideal for residential neighborhoods and everyday use
- Available with premium Harvia electric heating systems
- Enjoy authentic steam heat with minimal maintenance

Best-Fit Uses

- Homes and backyard wellness retreats
- Primary residences seeking convenient daily sauna use
- Vacation properties and guest accommodations
- Resorts, gyms, and commercial wellness spaces
- Homeowners seeking authentic sauna benefits with modern convenience
- Outdoor residential or commercial installations

Heating & Installation

Aurora 68 & 68P

- Includes a Harvia KIP electric heater with built-in manual controls.
- Requires 240V single-phase electrical service and a dedicated 40-amp circuit.
- Hardwired installation by a licensed electrician is required.

Aurora 810 & 810P

- Includes a Harvia Cilindro electric heater with built-in manual controls.
- Requires 240V single-phase electrical service and a dedicated 50-amp circuit.
- Hardwired installation by a licensed electrician is required.

For all models:

- Copper conductors only.
- Breaker sizing and wiring must comply with local electrical codes and Harvia installation requirements.
- Installation requires a level foundation such as a gravel pad, concrete pad, or equivalent structural surface.
