- Full-length cedar benches
- Integrated floor drainage system

- Intake and exhaust ventilation
- Stainless steel compression bands
- Black corrugated metal roof
- Rechargeable under-bench lighting
- Designed and handcrafted in Alaska

Why Choose Wood-Fired?

For many sauna enthusiasts, nothing compares to the experience of a wood-fired sauna. The Frontier Series offers:

- Traditional sauna bathing without reliance on electricity
- Soft, comfortable heat and authentic steam
- Ideal for cabins, remote properties, and off-grid locations
- A quieter, more natural sauna experience
- The ambiance and aroma of a real wood-burning stove

Best-Fit Uses

- Homes and backyard wellness spaces
- Cabins and recreational properties
- Lakeside, riverfront, and remote retreats
- Lodges, resorts, and commercial hospitality settings
- Off-grid and limited-utility properties
- Alaska homeowners seeking an authentic traditional sauna experience

Heating & Installation

- All Frontier Series models include a Harvia M3 wood-burning sauna stove.
- Chimney, trim package, and heat shield system are included and installed.
- No dedicated electrical service is required for heating.
- Installation requires a level foundation such as a gravel pad, concrete pad, or equivalent structural surface.
- Adequate clearance must be maintained around the sauna and chimney in accordance with local codes and manufacturer requirements.

Approximate Weight & Site Planning
