

SB 68 Series Brochure

Handcrafted Alaskan Western Red Cedar Saunas

Experience traditional sauna bathing in a compact, handcrafted barrel sauna built for Alaska living. The SB-68 Series pairs premium Western Red Cedar construction with efficient heat performance and a space-conscious 6' x 8' footprint, making it a strong fit for homes, cabins, vacation properties, and backyard wellness retreats.

Series at a Glance

Notes

- **E** = Electric Heater Model
- **W** = Wood-Fired Heater Model
- **P** = Front Porch Configuration
- Capacity estimates may vary based on user comfort preferences and seating arrangements.

Standard Features

- Premium kiln-dried Western Red Cedar construction
- Precision-milled interlocking barrel staves
- Porthole-style front door window and tempered glass rear window
- Full-length cedar benches, drainage, and intake/exhaust ventilation
- Stainless steel compression bands and black corrugated metal roof
- Rechargeable under-bench lighting

Best-Fit Uses

- Comfortable seating for 4-6 people, or 2-4 people with the front porch configuration
- Homes, cabins, vacation properties, wellness spaces, and outdoor residential or commercial settings
- Low-maintenance electric heat or traditional wood-fired sauna operation

- Porch configurations available for a covered entry, cedar bench seating, and elevated platform

Heating & Installation Notes

- Electric models use a Harvia KIP electric heater with built-in manual controls.
- Electric service requirements: 240V single-phase, 40-amp dedicated circuit, hardwired installation, copper conductors only.
- Electric models require dedicated electrical service installed by a licensed electrician; breaker and wire size must comply with local codes and the Harvia manual.
- Wood-fired models include a Harvia M3 wood-burning stove, heat shield system, and installed chimney/trim package.
- Site requirements include a level foundation, adequate clearance, and required chimney or electrical service based on model.

Approximate Weight & Site Planning

SB-68 Series models are approximately 900-1,200 lbs. Capacity estimates may vary by seating arrangements and comfort preferences. 6' diameter x 8' length models are intended for outdoor residential or commercial use and should be installed on a level gravel pad, concrete pad, or equivalent foundation.

SB-68 Series | Compact footprint. Authentic sauna heat. Handcrafted Alaska quality.
